SUMMARY

Adept at collaborating with cross-functional teams to deliver high-quality projects within tight deadlines. Skilled in debugging, performance optimization, and deploying applications in cloud environments. Seeking a challenging executive role to leverage technical expertise, foster innovation, and drive engineering excellence.

WORK EXPERIENCE

Freelancer | 6 Months

Worked on multiple web development projects, including creating dynamic websites and full-stack applications using MERN stack and other technologies.

Delivered high-quality, responsive, and scalable solutions tailored to clients' needs, while managing project timelines and client communications independently.

Gained expertise in problem-solving, client relations, and meeting tight deadlines.

Technical Skills

● Frontend:

React.js: Skilled in building dynamic UIs with React, using Hooks and Context API for state management.

HTML5: Experienced in creating semantic, accessible, SEO-optimized web pages with multimedia elements.

CSS3: Proficient in responsive designs using Flexbox, Grid, animations, and transitions.

JavaScript (ES6+): Proficient in async/await, destructuring, modules, and promises for scalable apps.

TailwindCSS: Expertise in utility-first, customizable, responsive UIs for fast, consistent styling.

● Backend:

Node.js: JavaScript runtime for scalable server-side applications.

Express.js: Web application framework for Node.js, streamlining server creation.

● Database:

MongoDB: Proficient in NoSQL database management.

Mongoose: Experienced with MongoDB ODM(Object Data Mapping.)

● Version Control:

Git: Version control for tracking code changes.

GitHub: Cloud-based platform for hosting Git repositories.

● Tools:

Visual Studio Code: Code editor for efficient development.

Postman: Tool for API testing and development.

npm: Package manager for JavaScript dependencies.

● Others: RESTful APIs, JSON, Responsive Design

Additional Skills :

- **Programming Languages:** [Java](#) (Data Structures and Algorithms)
- **Database Management:** [SQL](#) (Advanced querying, relational databases, data manipulation)

Project: Blogging Application

Tech Stack: MERN (MongoDB, Express, React, Node.js), Redux Toolkit

Achievements:

- Developed a full-stack blog application with features for creating, reading, updating, and deleting blog posts.
- Implemented Redux Toolkit for state management to handle authentication, user profiles, and blog post data.
- Integrated secure user authentication using JWT (JSON Web Token) for login and protected routes.
- Created RESTful API endpoints for CRUD operations on blog posts and user management.
- Leveraged MongoDB for fast and efficient database storage and queries.
- Designed a responsive UI for seamless navigation, improving user experience with React Router.

Challenges:

- Handling secure authentication and JWT token management in the context of a single-page app.
- Ensuring smooth and efficient state management using Redux Toolkit, especially for authentication and user data.
- Implementing a responsive design to ensure compatibility across multiple devices and screen sizes.

Results and Impact:

- Delivered a fully functional blogging platform with secure user authentication and CRUD operations.
- Achieved seamless navigation with React Router and responsive design, improving user engagement.
- Reduced development time through the efficient use of MongoDB and Redux Toolkit for state management.

Collaboration:

- **Solo Project:** Managed all aspects of development, including back-end and front-end, and ensured smooth integration between the components.

Key Takeaways:

- Gained hands-on experience with building full-stack applications using the MERN stack.
- Enhanced skills in state management with Redux Toolkit and handling authentication with JWT.
- Improved knowledge of RESTful API development and secure user management in web applications.
- Learned how to design and implement responsive and user-friendly interfaces.

EDUCATION

Bachelor of Science in Computer Science Engineering (2021-2025)
Dr.APJ Abdul kalam Technical University (Lucknow)

Intermediate (2019-2021)
Eklavya Public School (Muradnagar)

HighSchool (2017-2019)
GreenLand Public School (Duhai)

Certifications

- MERN Stack Web Development - [[Great Learning](#)]
- Amazon Web Services- [[Amazon Academy](#)]

Extracurricular Activities

- Member of the Coding Club at my college [[RD Engineering college](#)]
- Participated in online coding competitions on platforms LeetCode
